EXPERIENCE

Staff Software Engineer
VISA
📅 10/2018 - 01/2022 📍 Singapore

I was part of VISA Checkout team at the Singapore Office.

- Built a web based credit card wallet for Indian market. Involved with major stakeholders of the industry like Flipkart.
- Accessibility and Security features for Visa Checkout with traffic of 5 million average users.
- Member of task force that kept tabs on major browser's upcoming features and how they will affect Visa's applications.
- Worked on a white label payment gateway for banks.

Front End Lead
The Stakeholder Company
📅 05/2017 - 10/2018 📍 Singapore

Realtime Global Sensing and Stakeholder management software

- Built the frontend of the application from scratch used by high profile organizations like CocaCola, McDonald's, Gazprom etc.
- Data Visualization, interactive maps and responsive data driven infographics.
- Dashboards for CEOs to show compose and condense information in a minimal UI.
- High performance, real-time node graphs with thousands of relations rendered on the browser.

Senior UI Software Engineer
Xylem (Visenti)
📅 01/2014 - 04/2017 📍 Singapore

Visenti built solutions for hardware sensing of pipe networks. Using AI and sensor data to allow better decisions for city infrastructure.

- Lead the development of frontend application designed to be a portal of data exploration of real-time sensors and AI algorithms.
- Worked with ArcGIS to create highly detailed data driven, interactive maps.
- Performance challenges showing very high resolutions on browser with websockets and 2d canvas.
- Real-time dashboard used by city authorities for crisis management in the pipe networks. Constrained by fast SLA and low failure rate due to the cirtical nature of the task.

Web Application Engineer
Obscure Interactive
📅 07/2012 - 12/2013 📍 Lahore, Pakistan

Actively engaged in several web based ventures for a technical solutions' agency.

- Transcribing software for NHS (UK) used by doctors. The application was a complete SaaS business with portals for doctors and transcribers.
- Electronic stores running on PHP and MySQL
- Highly interactive websites for digital marketing and campaigns

SUMMARY

Full Stack JavaScript developer with a background in UI Engineering. Exposure to building large scale web applications, non-trivial frontend and team leading. I strive for simple solutions and shipping quality code.
